Dear Mr. Pittman,

Here are the cut and fill calculations for this site.

Fill above B.F.E. = $((20,000 \text{ ft}^2 \times (10.2 \text{ ft} - 9.0 \text{ ft})) = 24,000 \text{ ft}^3 = 888.9 \text{ yd}^3$.

The existing crushed gravel on the Site will be used as the base material for paving. There will be no fill required for the paved vehicular areas.

Sincerely,
Chuck Dammon
