RE: Dream Land Mobile Home Park  
Nicholson, MS

Dear Mr. Mangano,

Dammon Engineering is pleased to propose our Engineering services to design the sewer and water connections for your mobile home park located in Nicholson, MS.

Our fee for this design will be \$7,500.00. If selected, we will require a deposit of \$500.00.

The sewer will require four manholes throughout the park. All will be gravity fed heading to the North end of the site into a 3,000 gallon solid separator and waste liquefaction tank, then into a 12,000 gallon treatment plant which will feed into a pump station spray head system and then will be dispersed onto 2.2 acre spray field on the North side of the park.

The potable water will be looped around the park with a 6" line with fire hydrants.

We need to meet and locate the amount of tie-ins for each trailer for water and sewer. Also, we will need power for the sewer system.

If you have any questions, or require any additional information, please feel free to call.

Sincerely,

Chuck Dammon, VP  
Dammon Engineering, Inc.
