

**CAMP VILLERE
NEW HOME CONSTRUCTION
State Project: LA14-A-037
Engineer's Project: 2210
Bi-Weekly Construction Meeting Minutes**

April 25, 2017
9:00 a.m.

Attendees:

Gerald J. Leonick, Camp Villere
Autry Chandler, LANG - Facility Engineer
Jason Cox, Grillot Construction
Charles Crawford, Grillot Construction
David Dammon, Dammon Engineering, Inc

Minutes:

- Meeting opened with a discussion about the 1st pay app for Grillot. James is running down the process to see when the pay will be paid.
- A discussion was held concerning the installation of the double layer of felt underlayment for the roof. The first 19-inch at the bottom of the roof shall have a starter course that is attached to the decking with the asphalt roofing cement. This shall apply to the entire roof. See Section 073113-3
- We are waiting on the Vinyl Plank samples and the plumbing submittals.
- The electrical submittals have been reviewed except the light fixtures.
- The front and rear exterior doors are shown on the plans as 7'-0" tall. The rear door has a 6'-8" door leading to a storage room next to it. This may look odd, so changing this rear door to a 6'-8" door would look more aesthetically pleasing.
- A site visit was performed to view the construction progress.
- Next scheduled meeting is 5/9/2017 at 9 am (0900).
