Re: **St. Tammany Parish Slidell Administrative Complex**
520 Old Spanish Trail
Slidell, LA 70458
PO320959

Dear Mr. Jones,

I am writing this letter to address another concern of Mr. Neil Ricca, Chief of Fire Prevention in Slidell, similar to my recent package to you dated 7-14-2010. This concern is as follows:

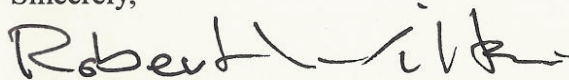

Please verify that two hour rated 8" CMU walls on the First Floor are compliant as shown on Sheet A-1, attached.

The problem is that the drawings are inconsistent, with Sheet S-1 (attached) showing additional two hour rated walls. Sheet A-1 indicates our design intent, to separate Open Areas 113, 115, and 116 from the rest of the building. All walls were built as 8" CMU, and Mr. Ricca is rightly going to require that the many penetrations be rated to conform to the rating of the wall, and obviously there are many more penetrations (see M-1, attached) to rate if the design must conform to that shown on S-1. Existing two hour rated walls shown on S-1 will remain.

Attached, please find relevant pages mentioned above from the resubmittal/restamp set. I have also included your original review letter and the reports from Fire Protection District #1.

Please contact me if I can further assist you in this review.

Sincerely,

Robert Wiltse
Chief Architect
