FY 2023

Act 521 of the 2016 Regular Session of the Legislature amended Louisiana Revised Statutes, Section 30:2194.1 to read: "No person shall place or dispense a regulated substance into an underground storage tank that has not been registered with the Louisiana Department of Environmental Quality and that does not have a current registration certificate."

The Motor Fuels Underground Storage Tank Trust Fund covers eligible participants for corrective action and third party claims up to \$1.5 million. This certificate is issued only after all fees have been paid and all tanks have been registered.

The certificate serves as proof that (1) all tank registration fees are current and up to date, (2) the registered tanks at this facility, that are not red tagged, can receive deliveries of motor fuel product, and (3) if the owner selected the Motor Fuel Underground Storage Tank Trust Fund (MFUSTTF) as their financial responsibility mechanism on the UST-REG form, this certificate provides evidence of the State and Federal required financial responsibility for this facility. Be advised, in case of a release, the final eligibility determination to use the MFUSTTF is also dependent on whether or not the owner's portion of financial responsibility is paid.
