RE: CSP Area Upgrade to Comply with USP 797
Slidell Memorial Hospital
1001 Gause Blvd.
Slidell, LA 70458
225-342-9029

Dear Mr. Blanchard,

SMH Pharmacy has contracted with Dammon Engineering, Inc. to design the new USP 797 compliant IV Room according to the Gap Analysis performed by New & Associates, LLC. SMH has identified a new location for the IV Room on the first floor of the hospital and is described in the plans that are attached.

10-25-10 Subsequent to the work detailed above, Slidell Memorial Hospitals' inpatient rehabilitation facility beds will be reduced from 15 to 9. The affected room numbers are 107, 108, and 109 and should be removed from the count. This will effectively decrease rehabilitation's square footage by 741 square feet. The rooms referred to above were previously used for rehabilitation and in the future will be used for a Pharmacy compound sterilization area.

Additionally, the pediatric total facility beds will change from 12 to 18. This change will affect Pediatric room numbers 2113, 2114, 2115, 2116, 2117 and 2118.

Please review and approve for compliance and call me with any questions or concerns you may have.

Sincerely,

Chuck Dammon
