**Subject:** APS1 Wiring Changes

Chuck:

I hereby authorize the change from 208/60/1 electrical configuration to a 220-240/60/3 electrical configuration and to add/remove/change electrical components to do so as per the instructions communicated by the motor/blower manufacturer.

I also authorize the addition of wiring and electrical components/devices to allow APS1 to be de-energized when the duct installed smoke detectors indicate a possible or real safety problem

These changes will not affect the MAS warranty on the APS1 unit.

Bob Wiltbank
