Re: Hontas MOB Addition

Mr. McMath,

Thank you for considering Dammon Engineering. We are pleased to propose our services for the subject project in Covington La.

We propose a fee of \$34,950.00 for Architectural, Civil, Electrical and Mechanical/Plumbing. This includes redrawing the existing building in CAD as well as the new improvements. This also includes a determination of the existing rainwater runoff and calculations for no net increase to the state highway.

In order to complete this project a new survey showing all existing improvements, utilities and subsurface drainage will be required. If a conventional slab is selected a copy of the soils analysis will also be required.

If selected, we will bill 100% of the total after the plans have been accepted the State Fire Marshal.

Our fee *does not include* the cost of designing a post tension slab, sprinkler or fire alarm systems, soils analysis, survey, drainage studies, wetlands determination, or other engineering studies that may be required by government agencies *nor does it include* the cost of plan review or permits by the municipality. These items, if provided by Dammon Engineering, will be billed at a "cost plus" fee.

We look forward to working with you on this project. Please indicate your acceptance of the above fee by signing below. If you have any questions, or require any further information, please feel free to call.

Sincerely,

If you have any questions, please contact me.

Thank You,

David Dammon
President

Don McMath
