Tool platform info if you can or just answer this question. If the room ends up 11 foot-3 inch from sheetrock to sheetrock will everything work for us all? You got the 21 inch cabinet, 16 inch from cabinet to head of chair when fully extended, 83 inches for chair and 15 inches from foot of chair to the wall. Would this work for you all. Let me know when you can Thanks

Stuart,

Robert the project manager is copied he needs specs for chairs, they have only 11.4 length and just double checking the spacing, needed as soon as possible. thanks

My 12 o clock cabinet I am building is 21 inches deep. Can you email me a spec on the chair they are using in patient rooms when you get a chance. Thank you
