Re: Homes in Buras, La.

Christian, per your request we will visually inspect the exterior and interior of the homes for structural problems. We will provide a complete comprehensive analysis of each of the five homes as identified by your company. We will provide a design to correct any structural problems that are noted and provide a design to minimize the swaying of the homes that the home owners are noticing. We propose a fee of \$2,500.00 per home. Any additional inspections of these homes during the construction period will be billed separately at our standard fee rate, please see the attached fee schedule.

Thank you for this opportunity to work with you in resolving this matter.

Chuck Dammon  
V/P Project Manager
