Slidell, La.

Dear Mr. France,

With regard to the referenced project, please note the following:

- 1) The 2x6 stud walls at 16" o.c. in lieu of the 2x4 walls and fastening system meet requirements for breakaway walls.
- 2) The owner has sprayed all material under the flood elevation with copper naphthanate solution, meeting all current criteria for breakaway walls.
- 3) Galvanized straps (USP NER 505 PAHD 42) and bolting were used to connect the framing to the columns; this method is approved.

If you have any questions, or require any further information, please feel free to call.

Sincerely,

Emmett G. (Pete) Dammon, P.E.
La. License No. 8796
