RE: Design for repairs to historical building on your property

Dear Jeannine,

Dammon Engineering proposes to furnish architectural and engineering services to provide drawings and specifications for repairs to the referenced building as follows:

1. Design new floor systems for balconies.
2. Design repairs to exterior and interior corner wall (Westside dining room balcony) and at interior corner where the column has been infested with termites and rot, below the metal beam.
3. Design new cap on balcony parapets, with particular attention to window rot that exists where present cap causes water to migrate to window sill.
4. Repairs to brick veneer.
5. Meet with Historical Society, architect and owner.
6. Replace doors, windows and frames where required.
7. Furnish site visits during construction on a non frequent basis.

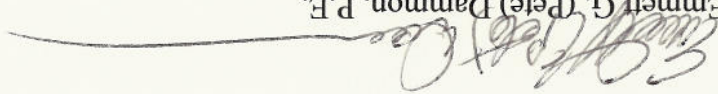

We propose to accomplish the task above for the total fee of

Dammon Engineering carries \$1,000,000.00 Professional Liability Insurance, auto insurance and Workman's Comp.

We look forward to working with you on this important project. Please indicate your acceptance below.

Sincerely,

Emmett G. (Pete) Dammon, P.E.

Jeannine Meeds
