

Signage Notes:

1. All signage to comply with ADA requirements to include braille, raised lettering, and symbols; color contrast; heights above finished floor; and character proportions.
2. Provide two directories per floor located near each elevator, in a visually appropriate location relative to traffic flow from entrances to elevators, and from elevator to general floor area. The directory will have a replaceable inserts by Owner and will be a slide-in paper insert from the Owner's in-house printer, with text by Owner. Directory on First Floor to have adequate spaces to list various agencies on floors above.
3. See Schedule for text of permanent signs. See example provided by Owner.
4. See Schedule for signage with replaceable inserts. See example provided by Owner. Replaceable insert will be by Owner and will be a slide-in paper insert from the Owner's in-house printer, with text by Owner. The digit on the sign will indicate the floor number. The letter on the sign will indicate the room in alphabetical order starting from the East end of the building and proceeding to the West.
5. Coordinate with requirements in Specification Section 101400 – Signage, and provide submittal for review.
