## Project Profile: Robins AFB

---

Contract No. #24042  
Robins AFB, GA  
Contact: Kevin Bentley  
Phone: 478-926-5479

Warner-Robins AFB wanted a paint booth to paint radomes. It was to be in the existing building, but they could not find any room. An outdoor weather-tight spray paint booth was installed attached to the existing building as shown in the photo above.

The paint booth consisted of: truck booth with metal building cladding on the outside and the roof. The booth has 3-stage NESHAP filters.

All interior panels on the booth are of 18-gauge galvanized sheet metal for easy cleaning. The cross flow booth has front walls flashed into the existing building so that entry into the booth is from the building with the radome parts. The air replacement system is located adjacent to the building

The Booth is 14' wide x 30' deep and 12' high.

**Specify Global Finishing Solutions for your next paint spray booth project.**
