Subject: RE: Super Hi-Flo Suction model SPC-3V

For sumps you need to strictly adhere to requirements of our instruction manual.

For this particular SPC-3V suction, you need to only use Waterway mating wall fitting, please refer to instruction manual.

Best regards,

Ray,

I have another question about the SPC-3V. Does your suction device require a sump to be VGB compliant or is a sump required for any of your suction devices?

Thank You,

David Dammon

We hereby confirm that our Suction model SPC-3V complies to the latest requirements of ANSI/APSP-16 standard (formerly ANSI/APSP A112.19.8 , 2008 and 2011 addenda b). Model SPC-3V and Wall Only Flow Rating 180 GPM must be molded on the suction cover.

Model SPC-3V has been tested , certified and listed by UL to the requirements ANSI/APSP-16 standard (formerly ANSI/APSP A112.19.8 , 2008 and 2011 addenda b) and complies to VGB and latest CPSC requirements.

Please see the attached certificate of listing.

Best regards,

Ray Mirzaei, CQE
