Subject: RE: The Village Gate Question

Okay....., not too sure where to go with this now? If slabs were poured, was any conduit laid for the access control system for the gates? Was there any conduit laid for a camera system?

Please let me know.

Thanks, Wayne

Subject: RE: The Village Gate Question

Wayne,

Sorry but there was just not enough load to justify a panel at the gates. Building D would be a little closer than the outside lighting panel that I mentioned. The trick will be getting into the building at this date because the slabs are poured.

Subject: RE: The Village Gate Question

Good morning Joe,

We, my integrator and me, were thinking we'd like to put the VertX panels and power supply for the readers and MAG locks somewhere near the gates. We thought that perhaps there were panels for the gate operator power supplies near the gate. From your message below it appears this is not the case and we'll have to make a long run back to Building D. I may call you tomorrow if that's okay?

Thanks, Wayne

Wayne,

Are you needing to know where the power for the gate controllers are fed from? If so... they are served from an outside lighting panel "OL" which is located on the NORTH side of Building "D" adjacent to the interior parking lot. This panel is about 350'-0" away from the new gates. If this is not what you need, please call me at 662-844-7114 or 662-401-1848.

Hope this helps,

Joseph D. Legge, P.E.
