Dear Mr. Dodge:

Thank you for you and Dr. DeBenedetto prompt response to my request for information regarding wastewater from our funeral home into the county sewer system.

Charlotte County Utilites had concerns about blood from the preparation room being placed into the sewer system. I met with their inspectors yesterday and after a brief discussion, the concerns they had were alleviated.

Your letter, the NFDA study, and other materials you furnished were very helpful. As a matter of fact the utilities company inspector requested a copy of same to help train their staff on the subject.

Thanks again.

Sincerely,

Kenneth L. Roberson
President
