CL1000 Standard Vertical Cabinet Lock

Cost effective, electronic vertical cabinet lock ideal for gym lockers, medical carts, cupboards and lockers, schools, changing rooms and offices.

Description	Specification	How to fit	How to program	Spares
<p>The CL1000 is an Electronic Cabinet Lock</p> <p>The CL1000 Cabinet Locks is a quick retrofit for keyed cam locks supplied as standard on a wide range of lockers, cabinets and cupboards. It can just as easily be fitted to units which don't have a locking device already fitted, giving the user immediate, simple, keypad access without the hassle of keys!</p> <ul style="list-style-type: none">CabinetsLockersMedical CartsGun BoxesSafesAvailable in Silver Grey FinishUse in offices / schools / warehouses / hospitals / care homes / nurseries / hotels / leisure facilities / the home <p>Available in one finish Silver Grey</p>  <p>In 2007 the Cabinet Lock CL1000 was awarded the Master Locksmith Association Highly Commended Electromechanical Security Product</p> <p>The CL1000 Cabinet Lock is available as a standard vertical model. Horizontal models are also available, Horizontal Right Hand and Left Hand models (handed by looking at the keypad side of the door - right hand hinge / hung = CL1000 RH). These two models were developed due to a lack of height, sometimes found when fitting the CL1000 in the vertical position. For example, internal post boxes.</p> <p>Color options available, please contact Codelocks.</p> <p>The CL1000 has a simple 10 button keypad and a # button which is used when programming. When closed the # button is covered by the lever.</p> <p>The CL1000 has 3 program levels:</p> <ul style="list-style-type: none">Master CodeSub-Master CodeUser Code <p>Functions</p> <p>Repeated Use This is the default function and is already pre-programmed in new locks. It is the most common functions and is used where the same code will be repeatedly used.</p> <p>Single Use (Locker Mode) The user enters a single use code which will lock and then open the lock once only and be erased. This function is used for short term, multi occupancy applications e.g. a locker in a leisure centre. The lock will now remain open until the next single use code is entered into the lock.</p> <p>The CL1000 is IP54 rated when used with the door gasket (CL1000DG), available as a separate part.</p>

The CL1000 is an Electronic Cabinet Lock

The CL1000 Cabinet Locks is a quick retrofit for keyed cam locks supplied as standard on a wide range of lockers, cabinets and cupboards. It can just as easily be fitted to units which don't have a locking device already fitted, giving the user immediate, simple, keypad access without the hassle of keys!

- Cabinets
- Lockers
- Medical Carts
- Gun Boxes
- Safes
- Available in Silver Grey Finish
- Use in offices / schools / warehouses / hospitals / care homes / nurseries / hotels / leisure facilities / the home

Available in one finish
Silver Grey

In 2007 the Cabinet Lock CL1000 was awarded the Master Locksmith Association Highly Commended Electromechanical Security Product

The CL1000 Cabinet Lock is available as a standard vertical model. Horizontal models are also available, Horizontal Right Hand and Left Hand models (handed by looking at the keypad side of the door – right hand hinge / hung = CL1000 RH). These two models were developed due to a lack of height, sometimes found when fitting the CL1000 in the vertical position. For example, internal post boxes.

Color options available, please contact CodeLocks.

The CL1000 has a simple 10 button keypad and a # button which is used when programming. When closed the # button is covered by the lever.

The CL1000 has 3 program levels:

- Master Code
- Sub-Master Code
- User Code

Functions

Repeated Use
This is the default function and is already pre-programmed in new locks. It is the most common functions and is used where the same code will be repeatedly used.

Single Use (Locker Mode)
The user enters a single use code which will lock and then open the lock once only and be erased. This function is used for short term, multi occupancy applications e.g. a locker in a leisure centre. The lock will now remain open until the next single use code is entered into the lock.

The CL1000 is IP54 rated when used with the door gasket (CL1000DG), available as a separate part.

CONTRACTOR FURNISHED AND INSTALLED

DELTA BATH MIXING VALVES

Model #: R10000-IP

Epay Decking Information

Epay Decking

– The Benefits of Epay

If you are looking for more knowledge on **Epay decking**, you've come to the right place. You might be wondering, what is the reality behind the hype? Does Epay really last? How can it be maintenance free?

The answer to these and many more questions comes right down to the natural properties. In fact, there are two major factors that make this wonderful and eco-friendly wood option stand out: Density & Natural Oils.

When you build with Epay, you'll notice right away that you're dealing with a dense material. This hardwood has a Janka rating of 3680 thanks to the grain and fibers being so tightly packed. This strength means that your Epay deck will:

- Outlast pressure-treated, composite decking & even California redwood decking
- Take heavy traffic and use without strain
- Effortlessly resist the impacts of harsh weather & temperatures
- Resist scratches thanks to no knots, slivers

The natural oils and tight grain also contribute to these major benefits:

- A beautiful reddish-brown color that slowly matures to a patina gray
- You can keep original color when using an eco-friendly deck oil finish
- Really great slip and stain resistance for an even safer surface
- Rigid structural stability with mold, decay, and termite resistance

Other decking materials require chemical treatments and a ton of routine maintenance. While other companies like to just say that their products last, only a hardwood like Epay has proved it.

To order Epay Decking call today. **1-877-232-3915**

INSTALLATION AND ROUGH-IN INFORMATION

IMPORTANT - This sheet MUST accompany each Installation Drawing

IMPORTANT: Echo® / Vantage™ or Echo® Plus / Vantage™ Plus Pedicure Chairs MUST be installed by a licensed electrician and a licensed plumber in accordance with all national, state and local codes/regulations.

IMPORTANT: Special Installation Requirements Pertaining To The State of Wisconsin

Gravity Drain

Pedicure chairs installed in this manner (Gravity Drain) MUST be treated like a bathtub installation and connect directly to the fixture trap most likely below the floor. Approved couplings (i.e. Fernco or Clamp All) may be utilized.

Pump Discharge

The pump discharge MUST terminate into an approved receptor with an air break. An air gap is not required.

- Upper dimensions are in inches, lower dimensions [] are in centimeters.
- **DEPENDING ON THE USE OF MANICURE TRAYS, THE EXACT DISTANCE BETWEEN PEDICURE CHAIRS WILL VARY GREATLY. THIS MUST BE DISCUSSED PRIOR TO INSTALLATION TO ENSURE ADEQUATE WORKING SPACE.**
A cup holder on the right side (as one sits in the chair) is standard on the Echo. There is no cup holder on a Standard Vantage. Please contact Continuum Footspas if additional information is required.
- **IMPORTANT! PLEASE DISCUSS CURVED PANELS WITH CUSTOMERS**
When replacing pedicure chairs, the curved plastic panels that are standard on most Continuum models may NOT cover existing connections beneath older pedicure chairs. Concealment Panels that extend to the floor will address this issue. Curved Concealment Panels that extend to the floor MUST be specified AT TIME OF ORDERING.
- **Electrical Requirements:** One (1) dedicated 15 amp, GFCI protected wall outlet/circuit per unit located within two (2) feet of the rear of the pedicure chair. (Actual draw is 5 amps) Each pedicure chair will be supplied with a standard four (4) foot grounded power cord. If utilizing an in-floor electrical box (EB), position box underneath curved plastic shrouds centered between H/C water inlets.
- **Water Supply:** One (1) each 1/2" hot and cold water supply. Locate shut-offs on the wall behind the pedicure chair (suggested range 4" to 12" apart on center, 4" to 8" A.F.F. (above finished floor) or may be roughed in through the floor as noted on Drawing #3. Provide 1/2" shut off valves and 1/2" MPT connections.
- Installation of optional drain pump MUST be noted on original customer order. Drain pump MUST be factory installed.
- If wall drain is utilized, 3/4" ID MPT should be installed. Suggested location is centered between Hot and Cold water supply inlets, 4" to 8" A.F.F. Use 3/4" ID hose to connect pedicure chair to wall drain.

SPECIAL INFORMATION REGARDING GRAVITY DRAIN INSTALLATIONS

- Always check with local plumbing inspectors for possible special requirements pertaining to pedicure chairs.
- Gravity drain is always preferred. If drain pump is NOT required, unit should be ordered WITHOUT drain pump.
- For gravity drain installations, refer to Plumbing Rough-In **Drawing #3**. If an air gap is required, also refer to **Drawing #4**.
- Gravity drain: Basin outlet is 1-1/2" female PVC. Rough-in: 3" minimum Hub Drain is recommended, 2" A.F.F.
- **With Standard Through Floor Installation**, it is recommended both H/C supply lines be located in the back portion of the spa (see Drawing #3). Electrical box may be centered between supply lines. Attempting to locate supply lines near the hub drain is possible but difficult due to space constraints, consequently it is NOT recommended. However, if supply lines are located in front, they remain 3.5" left and right of C/L and 7" back from C/L of hub drain.

Aqua-Pure®

Drinking Water Filtration System

Model No: AP-DWS1000

Call us at **1(800)-222-7880** for more information on purchasing this product.

Details

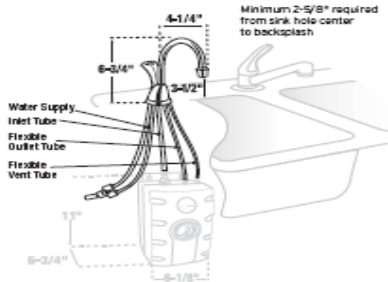

The Aqua-Pure® AP-DWS1000 Drinking Water Filtration System is an economical undersink alternative to bottled water that connects to a dedicated faucet. This system reduces sediment, chlorine taste and odor, lead, cyst, mercury, asbestos, VOCs and MTBE. 1/4" push-in fittings and tubing included. Rated at 0.6 gpm flow rate and 625 gallons capacity. Includes polished chrome dedicated faucet and tubing.

Instant Hot Water Dispensers

HC-Wave-SS

Graceful, clean, transitional design dispenses instant near-boiling 200°F and cool drinking water

Submittal Sheet

- **Hot & Cool** - Dispenses near-boiling 200°F and cool drinking water
- Durable all metal construction
- 35% more near-boiling water from larger 2/3-gallon stainless steel tank
- Easy to adjust temperature control
- Tool-free tank connections and dry start protection to ease installation
- Provides 60 cups/hr of near-boiling water
- Fits countertops up to 3" thick
- 3-Year We Come To You® In-Home Service Warranty*
- 115 volts, 750 watts, 6.25 amps
- **Available in these designer finishes:** chrome and satin nickel

Sample Specification

Instant hot water dispenser(s) shall be InSinkErator Model HC-Wave-SS with 2/3-gallon stainless steel tank, adjustable temperature from 150°F to 210°F and instant, self-closing hot valve.

Warranty:
 3-year parts and in-home service.

* The complete InSinkErator Warranty is included in the Care & Use booklet packed with each unit.

ARMSTONG CEILING TILES

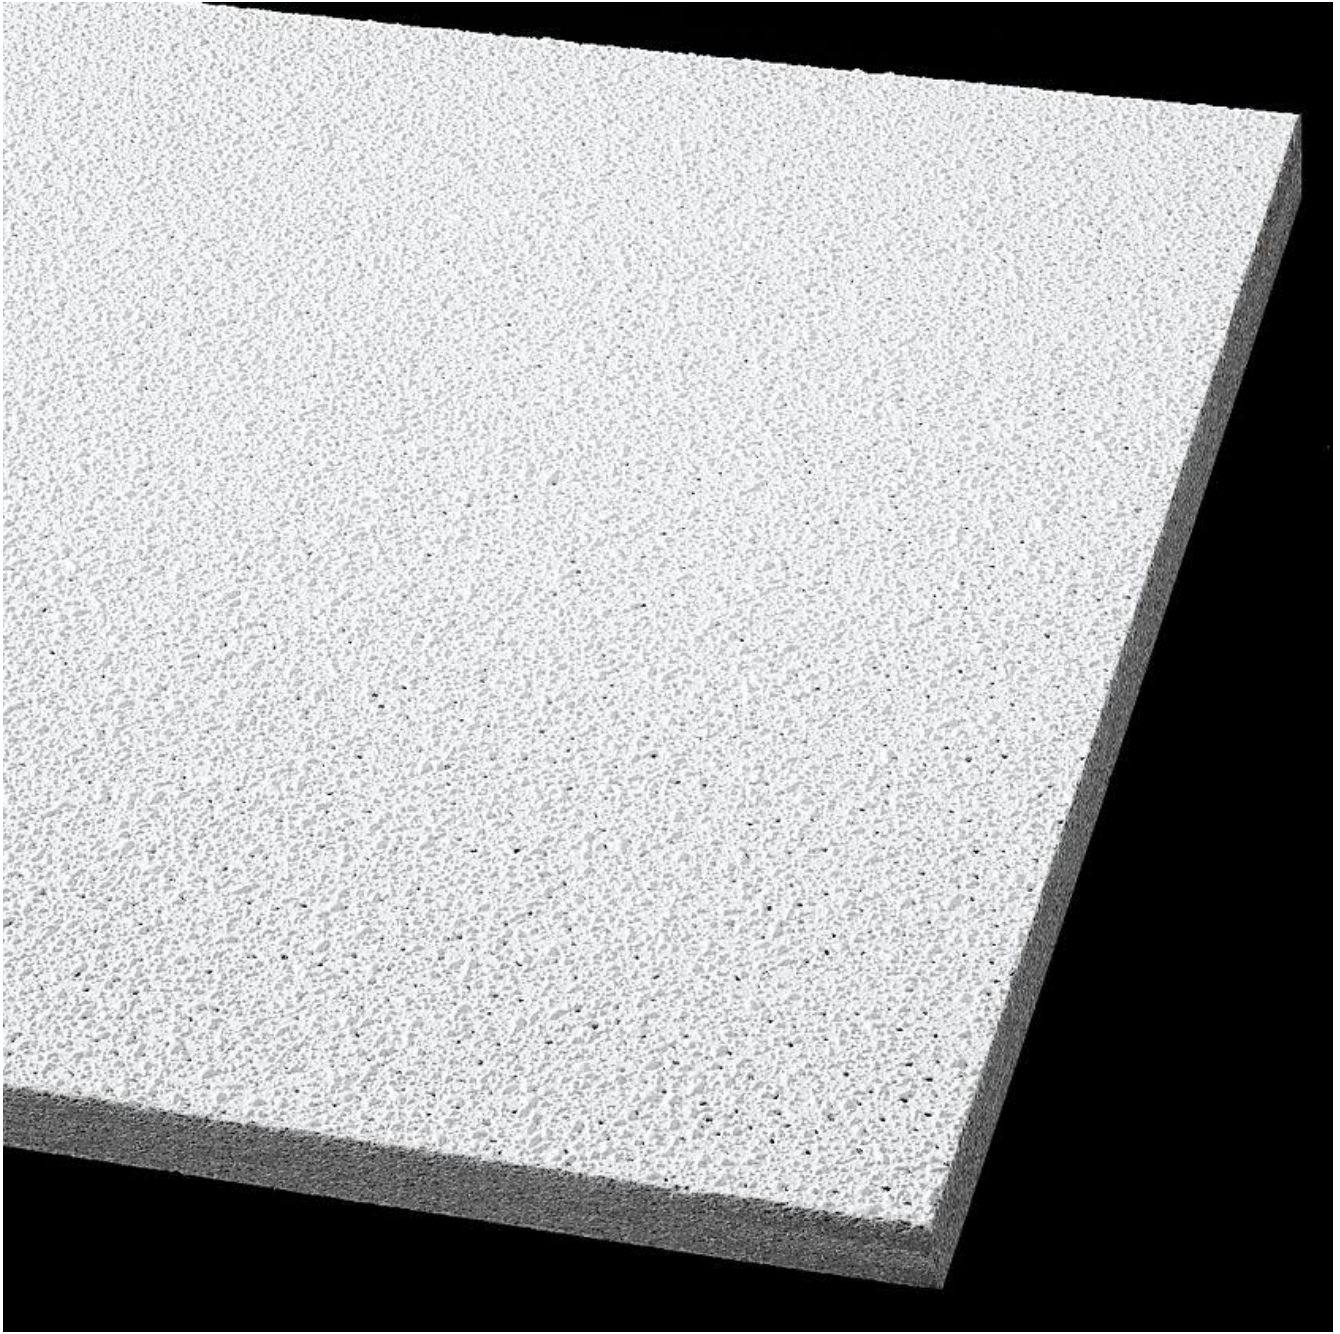

GEORGIAN

Medium-textured Georgian provides high light reflectance, HumiGuard Plus no sag performance and BioBlock paint to inhibit surface growth of mold and mildew and good overall performance and value. New high acoustics Georgian offers excellent acoustical values with an NRC of .65 and a CAC value of 38 (item 1750). New high washability Georgian is not only wash, impact and scratch resistant, it is also a scrubbable product that meets USDA/FSIS guidelines for use in federally inspected food processing establishments (items 793, 794 and 828).

Texture: Medium
