Re: Structural Design for Residential Expansion

Mr. Maki,

Dammon Engineering, Inc. is pleased to propose our engineering services to design the foundation and provide structural drawings for your expansion.

We propose a total fee of \$2,100.00 (Two Thousand One Hundred Dollars) for this work. Our fee includes the foundation and structural drawings for the residence expansion.

Our fee(s) *does not include* the cost of soils analysis, survey, drainage studies, wetlands determination, any interaction for the Coastal Use Permit or other engineering studies that may be required by government agencies. Our fee(s) also *does not include* design of the landscaping, sprinkler or fire alarm systems that may or may not be required. These items, if provided by Dammon Engineering, will be billed at a "cost plus" fee.

Dammon Engineering will provide five sets of hard copy drawings and electronic pdfs, ready for permit application, provided to you following 100% design completion and payment.

We require a \$1,000 deposit.

We appreciate the opportunity to propose our services for this project. Please indicate your acceptance of the above by signing below. If you have any questions, or require any further information, please feel free to call.

Sincerely,

Thank You,

David Dammon
President

Mr. Tim Maki
