RE: Walgreens On Site Pharmacy Interior Build-out  
Slidell Memorial Hospital  
1051 Gause Blvd.  
Slidell, LA 70458

Dear Mr. Heinen,

Dammon Engineering is excited to have the opportunity to propose our services for your referenced project to be located in Slidell, Louisiana.

We have reviewed your RFP, the Existing and New Design plans provided to us, as well as the Criteria Documents available on your website. We are prepared to provide you with a complete set of contract documents, including the Architectural, Structural, Mechanical, Plumbing and Electrical plans, along with any other documents required for permitting. As a full service Architect and Engineering firm, we are fully capable of completing the plans within the four week timeline stipulated in your RFP. We would, however, like to clarify that this design time does not include the Louisiana State Fire Marshal, or City of Slidell review period(s).

We propose to provide the complete Contract Documents listed above, including directing the drawings through all necessary reviews to obtain a building permit, periodic site visits (including field reports), reviewing shop drawings and submittals, as well as responding to all RFI's, for a Design Fee of \$15,264.00 (Fifteen Thousand Two Hundred Sixty Four Dollars).

Dammon Engineering was on the development team for the SOF Riverine and Combatant Craft Operations Facility in Stennis, Mississippi. This facility, like most government projects, required LEED functionality. Sustainable design strategies are always at the forefront of Dammon Engineering's designs. Energy conservation and minimizing affects on the environment, while maintaining improved occupant productivity, are some of the main criteria during the design process. Materials selected during the design process will support LEED guidelines to the greatest extent possible.

We have attached a brochure with additional information regarding Dammon Engineering, Inc. We hope that you will take a moment to review our qualifications.

We look forward to hearing from you soon regarding this exciting new project.

Sincerely,

Chuck Dammon, VP  
Dammon Engineering, Inc.
