Re: **New Office Complex**

Dear Barbara,

As per your recent request, Dammon Engineering, Inc. is writing this letter to advise you that we designed and prepared construction documents for the following project:

New Child Development Council Office Complex
U. S. Hwy. 167
Opelousas, LA

Further described as a 10,315 square foot masonry veneer building with standing seam metal roof on a pre-engineered metal building structure on a concrete foundation, with drop-off canopies, parking, and other exterior improvements, all on a 2.078 acre site on Hwy. 167 in Opelousas, LA.

The Construction Documents have been prepared in accordance with the professional standard of care and comply with applicable federal, state, and local codes and requirements to include the ADA, State of Louisiana Office of State Fire Marshal, and St. Landry Parish as evidenced by the review letters, inspection reports, permits and occupancies granted by the various agencies.

It has been a pleasure working with you on this project and we hope this facility provides your program with many years of performance and satisfaction.

Sincerely,

Robert Wiltse
Chief Architect
Dammon Engineering, Inc.

Emmett G. "Pete" Dammon
President and Chief Engineer
