
APPLICATION FOR CULVERT PERMIT

**THIS PERMIT IS FOR INSTALLATION OF SUBSURFACE DRAINAGE
WITHIN THE CITY OF SLIDELL RIGHT-OF-WAY ONLY**

DATE _____

PROPERTY LOCATION: _____

OWNER: _____ TEL NO. _____

OWNER ADDRESS: _____ FAX NO. _____

CONTRACTOR: _____ TEL NO. _____

CONTRACTOR ADDRESS: _____ FAX NO. _____

Along with this permit application, please include a plan of construction indicating:

- Existing structures, roads, driveways, culverts (include type, size, and direction of flow), and utilities (include type and size, if known) that are within the proposed construction area;
- All proposed pipe and structures (include type, size, and direction of flow);
- If replacement of driveways are required, submit details including turn radius, width, type of surface material, type of base material, and thicknesses of surface and base materials.

Applicant understands that City Engineering Department must complete an **inspection of the installed drainage improvements PRIOR to covering pipe with backfill**. The applicant agrees to **schedule** the required inspection with the Engineering Department **at least two (2) working days prior to the desired inspection date**. The applicant or agent of the applicant must be present at the inspection. To schedule an inspection, call the City Engineering Department at **(985) 646-4270**.

Any deficiencies will be noted at the inspection and a proposed schedule will be set for corrective action and a re-inspection date will be set. The applicant understands the installed drainage work must comply with the approved drainage plan submitted for the project.
