

Advanced Building Products, Inc
Attention: Kris Anderson, President

Met on 11-30-04 with Phillip Sonnier and Robert Murray about new entrance requirements.

The following is what we discussed, determined and agreed:

- 1) The two utility poles will not be removed.
- 2) The propane gas tank in the rear will be relocated by Advanced at its expense.
- 3) The existing "common area" fence will be used and two 20 ft entrance gates will be installed as shown.
 - a. The 20 ft entrance gate next to the plant will be swinging;
 - b. The 20 ft center entrance gate will be sliding.
- 4) Concrete will be provided to Cleveland as shown.
- 5) A new rear entrance will be provided with flatwork as shown to Cleveland, no changes to fencing required; gate will be repaired.
- 6) Concrete flatwork will be 4000 psi, 6" thick, reinforced as required with WWF "highway mesh" and installed with joints as required and appropriate.
- 7) Flatwork will be staked out and approved by Advanced, Phillip Sonnier, before pour.
