This worksheet must be completed, signed, and returned to Quiznos Development Office before equipment will be ordered by Source One Distribution. Please fill out completely

All Qvent™ systems include a hood, 88 inches of stainless steel duct, and a fan package. If there are any "NO" answers to the questions below, this becomes a Non-standard order and exhaust fan and hood will arrive in shipments separate from all other equipment. Please verify that there is sufficient make-up air through the HVAC system to accommodate the Qvent™ exhaust requirements. Verify electrical service with disconnect on roof for fan connection. For more info on fan electrical requirements, make-up air requirements, installation issues, or if you have any technical questions, see the Qvent™ submittal document available for download at www.Qvent.com, or call Johnson Diversified Products.

Yes

No

Is the Holman Sandwich warmer being used a Model QT14 or MM14?

If no, Model _____

-Is the Finished (drop) Ceiling height less than 12 feet?↓

If No, indicate distance from floor to ceiling _____

Is the contractor supplied liquid tight ductwork straight (no offsets)?

If No, supply sketch of duct work path including rise, run, and offset information on a separate sheet. If sketch is not provided, fan static pressure will be .75. You may answer yes if static pressure will not exceed .5

Indicate Fan style

Flat roof

Pitched roof
Indicate rise/
run

Wall mount

No Fan
(deduct \$330)

Inline fan
(Add \$550)
*6 week lead

Inline fan
(Add \$750)
*2 week or less lead
