Sherwood and Chuck:

We are scheduling an architectural and engineering "kick off meeting" at the offices of the Bryan Company in Jackson, MS on September 19th at 10:00 AM. Your attendance is important so please confirm that you will be able to attend this meeting.

Thanks,

Marc

Yes, the 19th is good for me.

I will call you this afternoon.

Marc

I will be meeting with Jim week after next on Tuesday, Sept. 12th. (Next week is out because Monday is Labor Day and I am out of town Tuesday, Wednesday and Friday) I want to have the architectural base plans completely updated before we meet with the engineers. So, I will need a few days after meeting with Jim to do that. I would like to set up the meeting with the consultants in Jackson on Tuesday, Sept. 19th. Will that work for you?

I think the meeting should include you, me, Jim, Chuck, Sherwood and possibly any of your subcontractors you see fit, like maybe the electrical sub. Steve Bryan does not need to attend.

Call me as I have several other things to discuss.

Steve, when are you planning on meeting with Jim Bryson regarding Tyler , TX plans? As we discussed please proceed in scheduling the "kick off" architectural and engineering meeting in Jackson with the engineering consultants Sherwood Bailey and Chuck Dammon Engineering so we can update the "base plans". I will want to schedule the MPE subs so they can participate in updating these drawings.

Please let me know the schedule for these meetings.

Thanks,

Marc

Steve Hill to provide New info.

Chuck:

How long do you think it will take you to complete your drawings once you receive revised base plans form me? Note, there are not any major changes as I see it but there will be some. These are as follows:

1. The clubhouse plan maybe mirrored, so your drawings for this building would need to be revised to reflect that.
2. Most of the overall building plans are the same as either the Island Park or Grand Pointe plans. On a couple of plans, the unit mix is the same as a plan you already have but the offset in the building is different. On another the 3 bedroom units at the end are replaced by 2 bedroom units. So the changes are not that significant.
3. There will be little if any changes to the unit plans.
4. Jim has noted that there are a few things that we do differently now than how they are shown on your plans, so there will a few small adjustments that need to be made.
5. The Bryan Company wants us to update our specs as well. Again, this is probably minor.

Based upon the above description, if I email you revised base plans on Monday, September 18th, when can you have your documents ready to submit for permit?

THE END OF OCTOBER OR EARLIER

Chuck, please provide a proposal for structural and MPE documents for a 338 unit apartment project in Tyler, TX. The buildings will be similar to the Grand Pointe Apartments in Lafayette, LA and Island Park Apartments in Shreveport, LA.

Thanks,

Marc Naylor
