Subject: Revised electrical drawings - Reflections
Date: Tue, 15 May 2007 14:22:26 -0500

Tonight I am FedExing to Chuck Dammon a copy of his electrical drawings for Reflections marked up with changes that Bec wanted. I will be emailing him the revised floor plans as well. Even though I am passing this information along to him, someone from The Bryan Company needs to give Chuck a formal notice to proceed if you want him to revise his drawings.

Thanks.

Subject: Electrical Panel Locations
Date: Tue, 7 Nov 2006 11:33:34 -0600

Chuck:

Did anyone ever tell you that we relocated the electrical panelboards in the typical units on the Tyler Texas project from the utility rooms to the kitchens, on the wall directly opposite the refrigerator?

Subject: Tyler Texas Apartments for Steve
Date: Tue, 19 Sep 2006 16:04:24 -0500

Chuck,

Steve wanted me to send you the drawing files for Tyler Texas. I'm sending a zip that contains all the floor plan plot sheets with the files needed to support that. If you want bound drawings, please let me know and I'll send that. It's been a while since I've had to email you anything and I can't remember how you preferred getting our drawings. Just let me know if you need something else or want a different format of what I sent today. Thanks!

Cindy Smeltser

Chuck, you were emailed a 12 unit building plan from Steve Hill for our Island Park and Grand Pointe Phase II projects. We need a fee for the plumbing, HVAC and electrical engineering.

Description

Island Park Phase II is located in Shreveport, LA and is 14 identical buildings and a pool/activity building.

Grand Pointe Phase II is located in Lafayette, LA and is 10 identical buildings and a pool/activity building.

All the buildings are identical.

Please get me a fee and the schedule for completion of the documents is four (4) weeks.

As additional note the schedule for the Tyler, TX documents is November 3, 2006.

Thanks,

Marc Naylor

Chuck:

Over the past few weeks I have made quite a number of changes to the Island Park Phase II 12-unit apartment building plans. I don't know how much progress you have made on that project, but I would suggest that you hold on any further work until I send you the revised plans. I am trying to get a meeting set up next week in Jackson to review the plans with the Owner. I will send you the revised plans after that meeting. Thanks.

Steve, Is there a gazebo and maintenance bldg. for the Tyler texas site?

Thanks
Chuck

Attached are base plans for the new 12-plex building that Steve Bryan is going to do. Marc Naylor said he was going to contact you about do the engineering. I don't know if he has yet, but in any case I said I would email you the plans when I had them ready. Hopefully, you know what I am talking about. If not, give Marc a call. Thanks.

p.s. I look forward to seeing you in Jackson for the coordination meeting for the Tyler Texas project.

The first email below was about the Island Park Phase II 12-plex, which is also in the subject line. You then asked about the Tyler Texas project. When you asked about the sheet size, I assumed you were talking about the 12-plex.

The overall layouts will be the same as the overall layouts will be the same as Grand Pointe. The overall layout is now called Cumberland Apartment Community.

As for Tyler, we will use the 30" x 42" sheets, same as Grand Pointe. The overall bldg layouts would not fit on the 1/8" border, we had to use 3/32" border for that. The unit plans and leasing will fit on the 1/4" sheets. It will still be on the 24"x36" sheets when plotted.

Steve Hill <steve@beattyhill.com> wrote:
We decided to do these on 24" x 36". I am going to have overall plans of both floors at 1/8" scale. I am also going to create new sheets which have the units at 1/4" scale. It will probably be middle next week before I have the 1/4" plans done. Will you do everything at 1/8" scale or do you also want the 1/4"?
