FLOODPROOFING CERTIFICATE

FOR NON-RESIDENTIAL STRUCTURES

Floodproofing of non-residential buildings may be permitted as an alternative to elevating to or above the Base Flood Elevation; however, a floodproofing design certification is required. This form is to be used for that certification. Floodproofing of a residential building does not alter a community's floodplain management elevation requirements or affect the insurance rating unless the community has been issued an exception by the community to allow floodproofed residential basements. The permitting of a floodproofed residential basement requires a separate certification specifying the design complies with the local floodplain management ordinance.

FIRST BAPTIST CHURCH NG OWNER'S NAME	FOR INSURANCE COMPANY USE
4141 PONTCHARTRAIN OR HWY STREET ADDRESS (Including Apt., Unit, Suite, and/or Bldg. Number) OR P.O. ROUTE AND BOX NUMBER	POLICY NUMBER
SLIDELL LOCALITY DESCRIPTION (Lot and Block Numbers, etc.)	COMPANY NAIC NUMBER
LOUISIANA 70458 STATE ZIP CODE	

SECTION I FLOOD INSURANCE RATE MAP (FIRM) INFORMATION

Obtain the following from the proper FIRM:

COMMUNITY NUMBER	PANEL NUMBER	SUFFIX	DATE OF FIRM INDEX	FIRM ZONE	BASE FLOOD ELEVATION (In AO Zones, Use Depth)
220204	22103C0435F	-	4-30-2008	-	AE, E.L. 12'

SECTION II FLOODPROOFING INFORMATION (By a Registered Professional Engineer or Architect)

Floodproofing Design Elevation Information:

Building is floodproofed to an elevation of 14.0' feet NGVD. (Elevation datum used must be the same as that on the FIRM.)

Height of floodproofing on the building above the lowest adjacent grade is 8.4' feet.

(NOTE: for insurance rating purposes, the building's floodproofed design elevation must be at least one foot above the Base Flood Elevation to receive rating credit. If the building is floodproofed only to the Base Flood Elevation, then the building's insurance rating will result in a high premium.)

SECTION III CERTIFICATION (By Registered Professional Engineer or Architect)

Residential Floodproofed Construction Certification:

I certify that, based upon development and/or review of structural design, specifications, and plans for construction, the design and method of construction are in accordance with accepted standards of practice for meeting the following provisions:

The structure, together with attendant utilities and sanitary facilities, is watertight to the floodproofed design elevation indicated above walls that are substantially impermeable to the passage of water.

All structural components are capable of resisting hydrostatic and hydrodynamic flood forces, including the effects of buoyancy, and anticipated debris impact forces.

I certify that the information on this certificate represents my best efforts to interpret the data available. I understand that any false statement may be punishable by fine or imprisonment under 18 U.S. Code, Section 1001.

BRIAN A. MISTICH CERTIFIER'S NAME	30187 LICENSE NUMBER (or Affix Seal)
