RE: Invoice No. 5212

Dear Mr. Hopkins,

According to our records, there is presently due and owing a balance of \$10,105.00 on your account. We are enclosing a copy of the invoice in support thereof. We are formally demanding that the total balance of \$10,105.00 be paid not later than fifteen (15) days from the receipt of this letter.

Mr. Hopkins, we provided our services to you in good faith, fully expecting to be compensated for our efforts. Our current understanding is that debate about the Mechanical design has resulted in our not being fully compensated. If you will recall, Dammon Engineering designed an acceptable Mechanical System, which we were asked to change due to budget constraints. In fact, it was at the request of the General Contractor and Mechanical Contractor that we modified the Mechanical drawings *multiple* times. We *did not* charge additional fees for these alterations, but will do so, if it proves necessary to acquire legal services on this matter.

We urge you to settle this account with us as expeditiously as possible. To that end, please remit \$10,105.00, the entire balance of the delinquent account, to us without further delay. If payment is not received within fifteen (15) days, we will be forced to explore all legal recourse up to and possibly including a lien on the subject property.

Thank you,

Emmett G. (Pete) Dammon, P.E.
