Re: Dr. Aduli Sewer Force Main Extension
Extension of Tammany Utilities Timber Branch II Wastewater Treatment Facility Force Main
➤ 3 Inch PE SDR-11 DIPS Force Main Line
Covington, Louisiana
St Tammany Parish
DES Number 14-012
DHH/OPH Permit No. P14-09-103-026

Dear Mr. Kastner:

Plans and specifications of the above named project have been reviewed and found to be in substantial conformity with applicable provisions of the Louisiana Administrative Code. The design is, therefore, approved.

This approval refers to sanitary features of the design only, and is not to be taken as an approval of structural details, except insofar as they may affect sanitation.

This approval is issued with the stipulation that this Wastewater Collection System will be owned, operated, and maintained by:

Tammany Utilities
21454 Koop Drive, Suite 1D
Mandeville, LA 70471

The plans and specifications are being sent to the St. Tammany Parish Health Unit.

This approval is automatically canceled if construction of the project has not been started within two (2) years after the date of this letter.

After construction is completed, the engineer(s) and contractor(s) responsible for the design and construction of the project shall complete and submit the Certification of Construction Form to this Office (Region IX Office of Public Health, 71128 HWY 59, SUITE 102-B ABITA SPRINGS, LOUISIANA 70420) certifying that the project was constructed in accordance with the plans and specifications approved (or to which "no objection" was issued) by this Office. Please be reminded that this permit is not considered final until the completed Certification of Construction Form is received by this office.

Re: Dr. Aduli Sewer Force Main Extension
St. Tammany Parish

If construction commences before a permit is granted, a Notice of Violation will be issued for the project. A letter of "no objection" will not be issued on any pre-constructed project unless the project fully complies with the requirements of the Sanitary Code.

In the event that it is determined at some point in the future that a design error escaped our detection during our review of these plans and specifications, that oversight shall not relieve you, the applicant, of the responsibility for complete compliance with the requirements of the Louisiana Administrative Code [particularly, LAC 51 (Public Health-Sanitary Code) and LAC 48 (Public Health-General)], specifically including correcting the violations inadvertently overlooked.

Please be reminded a permit from the state health officer must be obtained for any modification(s) to this system which changes the system's capacity, effluent quality, point of discharge, hydraulic or contaminant loadings, or operation of the component units of the system prior to beginning construction.

If you have any questions or require additional information, please call me at (985) 871-1283.

Respectfully,

A handwritten signature in black ink, appearing to read "Marcus N. Redford". The signature is fluid and cursive, with the first name "Marcus" being the most prominent.

Marcus N. Redford, P.E.
Region IX Engineer
