Create Traditional Looks

Artisan® Lap Siding

An architectural grade product that couples stunning beauty with superior structural integrity. Deeper shadow lines and tongue and groove joints combine to create a superior aesthetic.

HardieShingle® Siding

Get an authentic cedar shingle appearance with minimal upkeep. HardieShingle siding adds the distinct aesthetic of wood as either a primary or complementary siding type, and is available in four styles.

HardiePlank® Lap Siding

Get the charm and character of wood with minimal maintenance. HardiePlank siding is America's most popular brand of siding. Browse several textures and styles to achieve your desired look.

HardiePanel® Vertical Siding

Approach traditional design with durable panel boards. Select from textures and colors to bring HardiePanel vertical siding board to life as a primary siding type or pair it with HardieTrim boards to attain a board-and-batten look.

HardieTrim® Boards

Complete our plank and panel products with high performance trim boards from James Hardie. In several textures and ColorPlus colors, HardieTrim provides design flexibility for columns, friezes, doors, windows and other accent areas.

HardieSoffit® Panels

Sold in both non-vented and vented styles. Vented styles eliminate the need for separate box or strip vents. Used to enclose framework on eaves, the panels are available in a range of sizes to ensure a perfect fit.

ColorPlus® Technology

For the ultimate in performance and consistent color, choose ColorPlus® Technology. Available on all traditional siding products, ColorPlus Technology is a factory-applied professional finish. Color is baked-on in a controlled environment, allowing for a consistent and long-lasting application, thereby reducing the need to repaint over time.

Embody a modern aesthetic

Hardie® Reveal® Panel System

Get the look you are after with the solution that offers design flexibility. The Hardie® Reveal® Panel system can be utilized to create an effective modern, durable, panelized look.

A system of components specifically developed for multifamily and light commercial construction. If your project calls for a panelized look — the Hardie Reveal Panel system offers the design flexibility you need.

Beginning with a commercial grade panel developed for multi-family and light commercial applications, the Hardie Reveal Panel System is a complete solution for creating a panelized look. Eliminate the guesswork in creating this look with the Hardie Reveal Panel system, with all parts including panels and trims supplied by James Hardie. Check for availability and call us to request a James Hardie Preferred Installer when specifying the Hardie Reveal Panel system.

Design Freedom

- Horizontal or vertical application
- 7/16" thick, commercial grade panels
- Cleaner look with fewer fasteners (approximately 14-21 per 4' x 8' panel)
- Standard is nominal 4' x 8' to allow for 1/2" joint
- Panels available with ColorPlus Technology
- Panels can be cut on-site to desired size

Unique Aesthetic

- Sharp express joint look with deep shadow lines
- Smooth panel look with exposed fasteners
- Trims and fasteners can be field painted or left with a metal finish
- Off-stud jointing solution provides design flexibility

Proven James Hardie Durability

- Engineered for Climate® to stand up to the demands of your project's specific climate
- Commercial panel developed specifically for use in multi-family, mixed use, senior living and light commercial facilities
- Ventilated rain screen assembly incorporates best practices for moisture management
- Proven performance with James Hardie fiber cement panels coupled with durable aluminum trims

James Hardie Commercial offers high performing products, systems and services designed to **protect your vision.**

James Hardie Commercial products offer a unique combination of **durability, affordability and performance** making them the smart choice for long-term success.

Plus, James Hardie Commercial offers design support and installation training to promote best practices and efficiency, minimize risk and help you get it right every time.

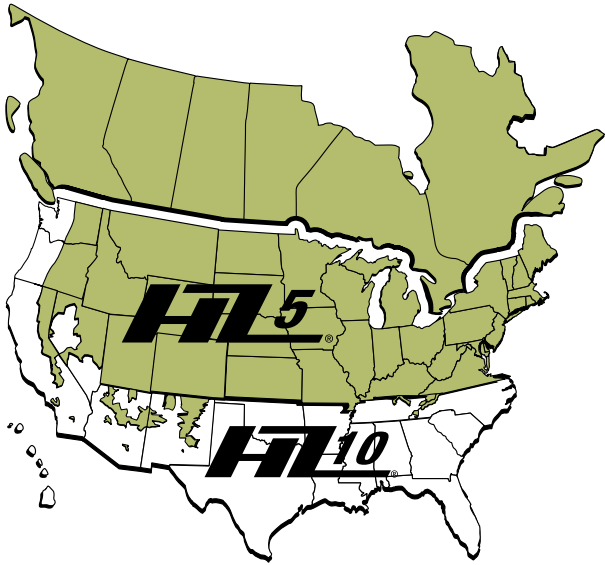

Invest in an Exterior that is Engineered to Last

Composed of fiber cement, James Hardie siding products and systems leverage the long-lasting, durable properties of cement itself. Backed by more than \$100 million in research and development, all James Hardie siding products* are non-combustible and resist cracking, swelling, rotting and splitting.

On top of that, all James Hardie siding products are Engineered for Climate® to face the demands of your project's specific climate. When UV levels, snow, wind, rain, pests and flame are at their worst, James Hardie siding products deliver lasting durability and protection for your investment.

F15 Products designed to resist damage from snow, ice, moisture and maintain dimensional stability in challenging climatic conditions.

F10 Products designed to offer the broadest coverage for hurricane prone regions by resisting damage from intense heat, UV rays, moisture and high winds.

Choose a Long-Term Business Partner

We provide a range of services to enhance design, improve quality and reduce costs.
