SCI PRECAST

Dammon Engineering
August 2, 2013

RE: Hwy 11
Slidell, LA

We are pleased to give you the following estimate for a max of (4) RV line tie in. (Pending permit from DHH/OPH)

Furnish and Install:

Hoot 500 ATU with tablet chlorinator, ER and 100' of 4" discharge line gravity flowing to the ditch.

Cost \$2,700.00

Owner to supply power to aerator.

Payment due upon completion.

Note: Responsibility of Owner/Contractor:

- * SCI Precast not responsible for sidewalks, driveways or fences accessing worksite.
- * Must obtain permit from local Health unit before installation.
- * Required to fill tank with water to prevent floating after installation.
- * Settling that occurs around tank after installation requires additional filling and grading.
- * Proper size electrical circuits terminated in equipment housing by the electrical contractor. This must be in place for approval from DHH/OPH. Extension cords are not acceptable.
- * Any utility lines not marked by LA One Call are the responsibility of the contractor/property owner.
- * Any excess dirt due to excavation, SCI will pile beside new STP.

Note: Not included in Proposal:

- * Sheet piling/shoring/well point. * Engineered foundation.
- * All pipelines run are at a maximum of 2' underground, any variance in depth subject to price increase.
- * Single sewer line tie in unless otherwise noted. Landscaping/yard restoration.

Estimate valid 30 days from date.
