Sorry but during the meeting I didn't get the size steel correct for a Fritch Beam, the steel would need to be 1.5 inch thick x 12 inch tall.

I looked at the VERSA-LAM load table and found that either a Triple Ply 1.25" that is 20" tall or a Quadruple Ply 1.25" that is 18" tall will work for the open span you were looking at.

The image shows a screenshot of a document titled "VERSA-LAM® Floor Load Tables". The specific table is labeled "VERSA-LAM® 2.0 3100 (100% Load Duration)". The table contains multiple columns and rows of numerical data, likely representing load capacities in different units or configurations. The table is partially obscured by a grid overlay.
