

Scope of Engineering Work

May 31, 2017

For: Tara Ingram Hunter
City Of Slidell
Planning Department

Ref: 2nd street sidewalks and drainage
City of Slidell

This area of town is very old. The original design of this neighborhood did not include sidewalks and drainage that coincided together. Although they were both added at a later date, the current layout does not meet the need of the current standards. The area in question on 2nd street is approximately 1400 linear feet.

Sincerely,
Chuck Dammon
