RE: Relocate mechanical room from 1st floor to a new mezzanine
St. Tammany Parish Government
Administration Complex
521 Old Spanish Trail
Slidell, La. 70458

Dear Mr. Crouch,

It was a pleasure to discuss with you the relocation of the 1st floor mechanical room to a new mezzanine, at the Slidell Administrative Complex. As discussed, Dammon Engineering, Inc. proposes to provide our Engineering services to design and provide construction surveillance, on the 300+ square foot mezzanine, and relocation of existing boiler and HVAC equipment to the new area.

We propose that the new boiler room would be located in the 2nd floor area just south of the existing boiler room in the north side of the building, and be supported by new columns from the existing foundation.

We estimate the total construction cost of this job, including new boiler, A/C unit and domestic hot water heater, to be \$175,000.00.

We propose an engineering fee of \$17,500.00 (Seventeen Thousand Five Hundred Dollars) for this work. This fee includes the Fire Marshal application fee, but does not include cost of soils analysis (if required) or other government agency fees. This fee also does not include the cost of traffic, or other engineering studies, which may be required by the parish. If selected, we propose to bill 75% following the Fire Marshal's review and response, and the balance during construction.

Dammon Engineering carries \$1,000,000 Professional/General Liability Insurance, Auto Insurance and Workmen's Compensation Insurance.

We look forward to working with you on this project. If you have any questions, or require any further information, please feel free to call.

Sincerely,

Emmett G. (Pete) Dammon, P.E.
