RE: Lockheed Martin Foundation Pad for Generator Installation
At Stennis Space Center, Mississippi

Dear Mr. Schlafly,

Thank you for the opportunity to propose our services for the referenced project. Dammon Engineering is pleased to provide you with our proposal to furnish Civil Engineering services for the above proposed project to be located at the Stennis Space Center in Mississippi.

Our design will consist of Civil drawings only. We would like to request a copy any soil analysis or piling reports of the area in question and any as-built drawings to help with our design of the new generator foundation.

We propose to furnish our services for a fee of 2% of the total construction cost. If selected, we propose to bill in consonance with the design completion percentage, at approximately 25%, 50%, 75% and 100%.

Our fee does not include the cost of soils analysis, drainage studies (beyond site drainage plan), wetlands determination, IBC review, or other engineering studies that may be required by government agencies. Five sets of drawings, ready for permit application, will be provided to you following 100% design completion.

By signing below you acknowledge that you are duly authorized to enter into and execute contracts/agreements on behalf of *Schlafly Engineering, LLC*.

Dammon Engineering carries \$1,000,000. Professional/General Liability Insurance and Workmen's Compensation Insurance. We appreciate the opportunity to propose our services for this project. Please indicate your acceptance of the above by signing below. If you have any questions, or require any further information, please feel free to call.

Sincerely,

Charles K. Dammon, VP
