I have discussed with the owner of the existing retention pond about my site (La Quinta) being allowed to utilize the existing retention pond for our drainage. The original design of the pond included all the surrounding attached land, which includes my site. Although the original design of the pond was oversized for these sites to drain into, the rear of my property has been encroached by the retention pond in the rear of my property.

This letter is to satisfy the drainage for my site.

Dr. Eduardo Hernandez

Concurrence

Ronald Lonnborg
