REQUEST FOR VARIANCE LETTER

Project Name: Chateau Napoleon Apartments
Location: Jefferson Parish, Louisiana
Date: 6-5-2015

Dr. Jimmy Guidry,
State Health Officer

Please consider this letter an official request for variance for two underwater seat benches as shown per plans being submitted. Both the underwater benches meet the "Underwater Seat Bench Variance Criteria" listed as part of the LAC 51 XXIV Swimming Pools, specifically the following:

- Benches are in water depths less than 5'-0".
- The Benches do not project into swim lanes, as this is a free form pool design.
- The benches are designed at 17 1/4" of water depth, falling within the specified 14 to 18 inch water depth margin.
- The benches are designed at 18" in width.
- The benches will have a leading tile band to be dark colored, contrasting 2" x 2" tile on both edges of the corner of the benches.
- The bench edges will have a 1" radius.
- Both benches are joined with the main entry exit steps.
- The benches are not used as entry / exits.
- A handrail is to be installed in full compliance with such requirements as required in the LAC Title 51 Part XXIV (swimming pools) as indicated within the plan set being submitted for approval.

The project plans for Chateau Napoleon Apartments Pool Renovation are reviewed by Dammon Engineering (*state licensed engineers*) for compliancy with the LAC 51 XXIV swimming pools code.

Michael Rotolo,
Rotolo Consultants Inc.
