To answer the question about the foundation/concrete pad installation for the above referenced property; the foundation/concrete pad is part of the structural integrity of this home. It helps reduce the swaying of the home due to the home being built up on pilings and will over all reduce erosion under the home from flood tides.

When a home sways the structural integrity of the home is compromised, potentially leading to safety concerns. Having a concrete pad surrounding the base of the pilings helps reduce this effect and stabilizes it from high winds and hurricanes contributing to overall safety.

Brain Mistich
PE#30187

The seal is circular with a double-line border. The outer ring contains the text "STATE OF LOUISIANA" at the top and "PROFESSIONAL ENGINEER" at the bottom, separated by two stars. The center of the seal features the state emblem of Louisiana (a pelican feeding its young in a nest) and the text "BRIAN A. MISTICH" and "License No. 30187" below it.
