RE: Residential Addition

Dear Mr. Lacoste,

It was a pleasure to speak with you and discuss plans for the addition to your residence. Dammon Engineering is pleased to propose our architect and engineering services for the approximately 800 s.f. addition, including the floor plan, foundation plan & elevations.

We propose to furnish the design for \$4,500.00 (Four Thousand Five Hundred Dollars). Please note that our fee includes five sets of plans provided to you following design completion.

The above fee *does not* include the cost of soils analysis, drainage studies, wetlands determination, or other engineering studies that may be required by government agencies. Our fee also *does not* include any survey work, including locating of existing improvements, topo, inverts of existing ditch or elevation certificate.

If selected, we require a deposit of \$1,200.00 upon contract acceptance. We then propose to invoice the balance due following design completion.

Dammon Engineering carries \$1,000,000. Professional/General Liability Insurance and Workmen's Compensation Insurance.

We appreciate the opportunity to propose our services for this project. Please indicate your acceptance of the above, by signing below. If you have any questions, or require any further information, please feel free to call.

Sincerely,

Chuck Dammon, VP
Dammon Engineering, Inc.
