Re: Line reduction procedures for the Q2006 design

The line reduction methods for the new Q2006 design are as follows:

- 1) Reduce the 6'-0" POS Counter to 5'-0"
- 2) Reduce the 5'-0" POS Counter to 4'-0"
- 3) Reduce the 6'-0" Baser (Sandwich) Table to a 5'-0" unit.

Stainless Steel table for slicer will need to be adjusted accordingly. The table is available in three sizes, 36"Wx30"D, 48"Wx30D" and 60"Wx30D".

If the space does not accommodate the design after completing the steps above, please forward CAD drawing to either Donna Bush dbush@quiznos.com or Matt Robinson mrobinson@quiznos.com for assistance. The drawings will be scheduled into our production and completed as soon as possible.

Sincerely,

Matt Robinson
