REMOVABLE RUNNER RACKS

Removable Runner is a sturdy, versatile, high tensile extruded aluminum rack available in a variety of heights from 29" to 69". This rack has a broad range of storage and handling capacities that make it useful in any kitchen, institution, bakery or retail application. The extruded runners can be removed or inserted easily at $1\frac{1}{8}$ " intervals, providing a variety of pan spacings for high or low profile products. The runners can be independently adjusted without disturbing other runners. Runners can also be inserted on an angle for display purposes. Runners can be placed in a washer, steam cleaned, or washed in a sink. Uprights can be thoroughly cleaned with runners removed. The removable runner rack is mounted on heavy duty, stem type, 5" x $1\frac{1}{8}$ " non-marking NSF listed swivel casters. Shipped knocked down (KD) for freight savings via U.P.S. Racks may be ordered to satisfy virtually any height, width, depth or center spacing requirements.

Runners can be independently inserted at $1\frac{1}{8}$ " increments.
