

Subsurface Drainage
Ordinance Cal. No 3142
Ordinance P.J.S. No. 98-2893

The area between entrance and exit, and those portions of the right-of-way which have been defined hereinabove as restricted areas, may be filled only when the following requirements have been fully complied with, and upon adoption of a resolution by the governing authority.

1) Letter addressed to the Parish Engineer requesting permission to enter the parish right of way for the purpose of installing subsurface drainage.

2) Drainage design of the subsurface system certified by a licensed Louisiana State Engineer. The following criteria must be satisfied:

- A. Drop inlets must be constructed for every fifty (50) feet of pipe
- B. Largest pipe that can fit in existing ditch must be used for design, including the driveway culvert
- C. Surface drainage shall be provided so that all surface water on the filled-in-areas shall be carried away from the roadbed in a suitable manner. The drainage opening underneath the filled-in area shall be adequate to carry the water in the roadway side ditches.
- D. Elevations, top of casting and pipe inverts must be shown on the drawings to demonstrate compliance with the given design criteria.

3) Signed and notarized Hold Harmless agreement.

4) Copy of liability insurance coverage naming the Parish as an insured party.
