

Components and Cladding		All Building Heights
Figure 30.10-1	Wind Loading – Roof Overhangs	C & C
All Building Types		Wind Load on Roof Overhangs

Notes:

1. Net roof pressure p_{ovh} on roof overhangs is determined from interior, edge or corner zones as applicable from figures.
2. Net pressure p_{ovh} from figures includes pressure contribution from top and bottom surfaces of roof overhang.
3. Positive pressure at roof overhang soffit p_s is the same as adjacent wall pressure p_w .
