

Standard Guide to International Test Methods Associated with Textile Care Procedures¹

This standard is issued under the fixed designation D 6322; the number immediately following the designation indicates the year of original adoption or, in the case of revision, the year of last revision. A number in parentheses indicates the year of last reapproval. A superscript epsilon (ϵ) indicates an editorial change since the last revision or reapproval.

^{ε1} NOTE—Section 2 was modified editorially in September 2003.

1. Scope

1.1 This guide lists general home laundering and commercial drycleaning textile care procedures and the associated ASTM (American Society for Testing and Materials), AATCC (American Association of Textile Chemists and Colorists), CGSB (Canadian General Standards Board), and ISO (International Organization for Standardization) standards available for the testing and evaluation of textile products.

1.2 This guide identifies the national, regional, and international textile and apparel test methods available to manufacturers, retailers, importers, testing organizations and other related parties.

1.3 This guide provides a list of test methods that can be used by the reader to evaluate the properties of textiles and apparel during refurbishing, textile and apparel care instructions; and, textile and apparel care labels.

1.4 This guide is not intended to be used in the establishment of performance criteria, but as a guide for product development and purchasing contracts. The country of Canada, however, has some performance criteria cited in The National Standard of Canada—Care Labelling of Textiles in CAN/CGSB-86.1-M91 (see Appendix X1)

1.5 This guide is applicable to textile and apparel articles; excluding upholstery fabrics, mattresses, carpet, leather, fur, and yarns.

1.6 *This standard does not purport to address all of the safety concerns, if any, associated with its use. It is the responsibility of the user of this standard to establish appropriate safety and health practices and determine the applicability of regulatory limitations prior to use.*

2. Referenced Documents

2.1 ASTM Standards:

- D 123 Terminology Relating to Textile Materials²
- D 3136 Terminology Relating to Care Labels for Textile and

Leather Products Other Than Textile Floor Coverings and Upholstery²

D 3786 Test Method for Bursting Strength, Hydraulic, of Knitted Goods and Nonwoven Fabrics—Diaphragm Bursting Strength Tester Method²

D 3787 Test Method for Bursting Strength of Knitted Goods—Constant-Rate-of-Traversal (CRT), Ball Burst Test²

D 3938 Guide for Determining or Confirming Care Instructions for Apparel and Other Textile Products²

D 4720 Practice for Evaluation of the Performance of Window Coverings—Soft²

D 4721 Practice for Evaluation of the Performance of Bedcoverings and Accessories, Machine Washable and Dry-cleanable²

D 5034 Test Method for Breaking Force and Elongation of Textile Fabrics (Grab Test)²

D 5035 Test Method for Breaking Force and Elongation of Textile Fabrics (Strip Method)²

3. Terminology

3.1 Definitions:

3.1.1 For definitions of terms related to permanent care labeling, refer to Terminology D 3136 and AATCC Glossary. For definitions of other textiles terms used in this guide, refer to Terminology D 123, CAN/CGSB-86.1-M91, FTC 16 CFR Part 423, and ISO 3758.

4. Significance and Use

4.1 This guide identifies U.S., Canadian and other international test methods used in the process of determining and evaluating textile and apparel care label instruction effectiveness for properties such as colorfastness, susceptibility to damage due to retained bleaching agents, dimensional stability, safe ironing temperatures and appearance retention (see 1.5 for exclusions).

4.2 This guide is intended for general use by those who wish to compare care label evaluation methods of the United States with those of both The International Organization for Standardization (ISO) and the Canadian General Standards Board (CGSB).

4.3 The inclusion of AATCC, ASTM, CGSB, and ISO test methods provides broad reference information.

4.4 Consult specific ASTM textile fabric, apparel and home furnishing performance specifications for evaluation criteria.

4.4.1 A listing of all ASTM textile performance specifications may be found in Volumes, 07.01 and 07.02 of the *Annual Book of ASTM Standards*. These textile specifications are appropriate for apparel or textile products that have not been wet processed or dyed after the product was sewn into its final form.

4.5 *The National Standard of Canada—Care Labelling of Textiles* (CAN/CGSB-86 1-M91) includes performance criteria that is used in the evaluation of care claims, including written words or symbols, identified on garments or textile products that are offered for sale in Canada (see Appendix X1).

5. Summary of Guide

5.1 This guide lists test procedures used in evaluating care label instructions appropriate for colorfastness, susceptibility to damage due to retained bleaching agents, dimensional stability, safe ironing temperature, and appearance retention.

6. General Considerations

6.1 Wherever available AATCC, ASTM, CGSB, and ISO test methods have been listed to allow ease of comparison (see Fig. 1).

6.2 While AATCC, ASTM, CGSB, and ISO test methods may use similar conditions, it is important to note that the protocol may differ.

6.3 CGSB and ISO test procedures can not always be considered a direct comparison with, or a substitute for, test results from AATCC or ASTM test methods and vice versa.

6.4 The care procedures are listed in the order of customary consumer practice.

7. Home Laundering and Commercial Drycleaning Textile Care Procedures and the Associated Standards

7.1 This section is a list of general and specific international standards associated with the assessment of textile products for permanent care labels in the order of customary consumer practice.

7.1.1 Table 1 summarizes the general care procedures, the related care symbols, and the related standards;

7.2 *Assessment of Textile Products for Permanent Care Labels*—General information is given in the following standards:

7.2.1 ASTM Standards:

D 123 Terminology Relating to Textile Materials²

D 3136 Terminology Relating to Care Labels for Textile and Leather Products Other Than Textile Floor Coverings and Upholstery²

D 3938 Guide for Determining or Confirming Care Instructions for Apparel and Other Textile Products²

D 5489 Guide for Care Symbols for Care Instructions on Textile Products²

7.2.2 AATCC Standard:

Monograph Nomenclature for Subjective Rating Process³

7.2.3 CGSB Standards:

No. 2–M Conditioning Textile Materials for Testing⁴

No. 86.1-M91 National Standard of Canada - Care Labeling of Textiles⁴

7.2.4 ISO Standards:

ISO 105 - A01 Textiles—General Principles of Testing⁵

ISO 3758 Textiles—Care Labelling Code Using Symbols⁵

7.3 *Colorfastness, Including Staining*—General information is given in the following standards:

7.3.1 AATCC Standards:

Evaluation Procedure 1—Gray Scale for Color Change³

Evaluation Procedure 2—Gray Scale for Staining³

Evaluation Procedure 7—Instrumental Assessment of the Change in Color of a Test Specimen³

Evaluation Procedure 8—AATCC Chromatic Transference Scale³

7.3.2 GCGSB Standards:

CAN/CGSB-4.2-M Textile Test Methods:

No. 46-M/ISO 105–A02 Textiles—Tests for Colour Fastness - Part A02: Gray Scale for Assessing Change in Colour⁴

No. 47-M/ISO 105–A03 Textiles—Tests for Colour Fastness - Part A03: Gray Scale for Assessing Staining⁴

7.3.3 ISO Standards:

ISO 105 - A02 Gray Scale for Assessing Change in Colour⁵

ISO 105 - A03 Gray Scale for Assessing Staining⁵

ISO 105 - A05 Instrumental Assessment of Change In Colour for Determination of Grey Scale Rating⁵

⁶ Available from U.S. Government Printing Office, North Capital and H Streets, NW, Washington, DC 20401.

FIG. 1 Care Procedures With Associated Test Methods

7.4 *Assessment of Dimensional Stability Evaluation*—General information is given in the following standards:

7.4.1 *AATCC Documents:*

Monograph 1993 AATCC Standard Reference Detergent and Laundry Detergents in General⁴

7.4.2 *ISO Standards:*

ISO 3759 Preparation, Marking and Measuring of Fabric Specimens and Garments in Tests to Determine Dimensional Change⁵

ISO 6330 Textiles—Domestic Washing and Drying Procedures for Textile Testing⁵

7.5 *Washing and Drying Processes*—Specific information on colorfastness to laundering and dimensional stability testing is given in the following standards:

7.5.1 *AATCC Standards:*

Test Method 61 Colorfastness to Laundering, Home and Commercial: Accelerated³

Test Method 96 Dimensional Changes in Commercial Laundering of Woven and Knitted Fabrics Except Wool³

Test Method 99 Dimensional Changes of Woven and Knitted Wool Textiles: Relaxation, Consolidation and Felting³

Test Method 135 Dimensional Change in Automatic Home Laundering of Woven and Knit Fabrics³

Test Method 150 Dimensional Changes in Automatic Home Laundering of Garments³

Test Method 160 Dimensional Restoration of Knitted and Woven Fabrics After Laundering³

Test Method 179 Skewness Change in Fabric and Garment Twist Resulting from Automatic Home Laundering³

7.5.2 *CGSB Standards:*

CAN/CGSB - 4.2-M Textile Test Methods:

No. 19.1-M Colour Fastness to Washing - Accelerated Test - Launderometer⁴

No. 24.2 Dimensional Change in Laundering of Textiles⁴

No. 25.1-M Dimensional Change in Wetting⁴
 No. 58-M Colour Fastness and Dimensional Change in Domestic Laundering of Textiles⁴

7.5.3 *ISO Standards:*

ISO 5077 Textiles— Determination of Dimensional Change in Washing and Drying⁵

ISO 105-C06 Colour Fastness to Domestic and Commercial Laundering⁵

7.6 *Bleaching Processes*—Specific information on properties such as colorfastness and susceptibility to damage due to retained bleaching agents is given in the following standards:

7.6.1 *AATCC Standards:*

Test Method 61 Colorfastness to Laundering, Home and Commercial: Accelerated³

Test Method 114 Chlorine Retained Tensile Loss: Multiple Sample Method³

Test Method 172 Colorfastness to Non-chlorine Bleach in Home Laundering³

7.6.2 *CGSB Standards:*

CAN/CGSB - 4.2-M Textile Test Methods:

No. 55-M Loss in Strength and Colour Change of Fabrics Due to Retained Chlorine⁴

No. 58-M Colour Fastness and Dimensional Change in Domestic Laundering of Textiles⁴

7.6.3 *ISO Standards:*

ISO 105 - N01 Colour Fastness to Bleaching: Hypochlorite⁵

ISO 5081 Woven Fabrics - Determination of Breaking Strength and Elongation (Strip method)⁵

7.7 *Ironing/Pressing Processes*—Specific information on colorfastness to ironing/pressing testing is given in the following standards

7.7.1 *AATCC Standards:*

Test Method 133 Colorfastness to Heat: Hot Pressing³

7.7.2 *CGSB Standards:*

CAN/CGSB - 4.2-M Textile Test Methods:

No. 57-M Determination of Maximum Safe Ironing Temperature⁴

7.7.3 *ISO Standards:*

ISO 105 - X11 Colour Fastness to Hot Pressing⁵

7.8 *Dry Cleaning Processes*—Specific information on testing for colourfastness and dimensional stability to dry cleaning is given in the following standards:

7.8.1 *AATCC Standards:*

Test Method 86 Dry-Cleaning: Durability of Applied Designs and Finishes³

Test Method 132 Colorfastness to Drycleaning³

Test Method 157 Colorfastness to Solvent Spotting: Perchloroethylene³

Test Method 158 Dimensional Changes on Drycleaning in Perchloroethylene: Machine Method³

7.8.2 *CGSB Standards:*

CAN/CGSB - 4.2-M Textile Test Methods:

No. 20-M Colour Fastness to Water⁴

No. 25.1-M Dimensional Change in Wetting⁴

No. 29.1-M Colour Fastness to Dry Cleaning Solvent⁴

7.8.3 *ISO Standards:*

ISO 105 - C06 Colour Fastness to Dry Cleaning: Perchloroethylene⁵

ISO 105 D01 Colour Fastness to Dry Cleaning: Hydrocarbon⁵

7.9 *Appearance After Refurbishing*—Specific information on appearance after refurbishing is given in the following standards:

7.9.1 *AATCC:*

Test Method 88B Appearance of Seams in Durable Press Items After Repeated Home Laundering³

Test Method 88C Retention of Creases in Fabrics after Repeated Home Laundering³

Test Method 124 Appearance of Fabrics After Repeated Home Laundering³

Test Method 142 Appearance of Flocked Fabrics After Repeated Home Laundering and/or Coin-op Drycleaning³

7.9.2 *CGSB Standards:*

CAN/CGSB - 4.2-M Textile Test Methods:

No. 59.1-M Appearance After Repeated Domestic Launderings—Smoothness⁴

No. 59.2-M Appearance After Repeated Domestic Launderings—Seams⁴

No. 59.3-M Appearance After Repeated Domestic Launderings—Pressed-in Creases⁴

No. 65-M Determination of Strength of Bonds of Bonded, Laminated and Fused Fabrics⁴

No. 66-M Dimensional Change and Appearance After Dry-Cleaning of Coated, Bonded, Laminated and Fused Fabrics⁴

No. 67-M Dimensional Change and Appearance After Laundering of Coated, Bonded, Laminated and Fused Fabrics⁴

7.9.3 *ISO Standards:*

ISO 7768 Method for Assessing the Appearance of Durable Press Products After Domestic Washing and Drying⁵

ISO 7769 Method for Assessing the Appearance of Creases in Durable Press Products After Domestic Washing and Drying⁵

ISO 7770 Method for Assessing the Appearance of Seams in Durable Press Products After Domestic Washing and Drying⁵

7.10 *Other Standards*—Other standards which may be used in evaluation of other properties related to care labeling are listed in the following section:

7.10.1 *ASTM Standards:*

D 3786 Test Method for Bursting Strength, Hydraulic, of Knitted Goods and Nonwoven Fabrics—Diaphragm Bursting Strength Tester Method²

D 3787 Test Method for Bursting Strength of Knitted Goods—Constant-Rate-of-Traverse (CRT), Ball Burst Test²

D 4720 Practice for Evaluation of the Performance of Window Coverings—Soft²

D 4721 Practice for Evaluation of the Performance of Bedcoverings and Accessories, Machine Washable and Dry-cleanable²

D 5034 Test Method for Breaking Force and Elongation of Textile Fabrics (Grab Test)²

D 5035 Test Method for Breaking Force and Elongation of Textile Fabrics (Strip Method)²

7.10.2 *AATCC Standards:*
 Test Method 8 Colorfastness to Crocking: AATCC Crockmeter Method
 Test Method 86 Drycleaning: Durability of Applied Designs and Finishes³
 Test Method 116 Colorfastness to Crocking: Rotary Vertical Crockmeter Method³
 Test Method 128 Wrinkle Recovery of Fabrics: Appearance Method³
 7.10.3 *CGSB Standards:*
 1-GP-12 Standard Paint Colours⁴
 CAN/CGSB - 4.2-M Textile Test Methods:
 No. 9.1-M Breaking Strength of Fabrics - Strip Method - Constant-Time-to-Break Principle⁴
 No. 11.2-M Bursting Strength - Ball Burst Test⁴

No. 33.1-M Method of Pressing - Ironing⁴
 No. 33.2-M Method of Pressing - Steam Pressing⁴
 No. 33.3-M Method of Pressing - Steaming⁴
 No. 33.4-M Method of Pressing - Tension Pressing⁴
 No. 46-M/ISO 105-A02:1987 Gray Scale for Assessing Change in Colour⁴
 No. 47-M/ISO 105-A03:1987 Gray Scale for Assessing Staining⁴
 7.10.4 *ISO Standard:*
 ISO 9867 Evaluation of the wrinkle recovery of fabrics - Appearance Method⁵

8. Keywords

8.1 apparel; care label; care procedure; care symbol; fabric; international; label; textile; textile products; test methods

APPENDIX

(Nonmandatory Information)

X1. CANADIAN CRITERIA TO EVALUATE INSTRUCTIONS ON A CARE LABEL

TABLE Canadian Criteria to Evaluate Instructions on a Care Label^{AB}

Property	Criteria
Laundrying—Washing and Drying Combined	
Colour Fastness (Grey Scale)	
Colour Change	4
Staining	4
More than one colour including white or almost white	3-4 Nylon
More than one colour including white or almost white	4-5
Dimensional Stability	
Wovens (grow or shrink)	2 %
Knits	
Weft-knit underwear or sleepwear	10 %
Warp-knit slips, gowns, or other lingerie & sleepwear	5 %
Casual wear (including but not limited to T-shirts, jogging suits, sweaters)	6 %
Dresses, shirts, jackets, pants, coats, blouses, dress shirts	3 %
Home furnishing items	3 %
Bleaching	
Colour Fastness (Grey Scale)	
Colour Change	4
Staining	4
Damage Due to Retained Chlorine	
Yellowing on Whites	4
Colour Change on Colours	4
Strength Loss	10 %
Ironing	
Colour Change	...
Dry Cleaning	
Colour Fastness (Grey Scale)	
Colour Change	4
Staining	4-5 Whites only
Dimensional Stability	...

^AThis table is for information purposes only.

^BApplicable to Garments and Fabric; The National Standard of Canada—Care Labeling of Textiles (CAN/CGSB-86.1-M91) (see). The Canadian test methods are used when evaluating the instruction on a care label against the above criteria.

 D 6322 – 00^{e1}

ASTM International takes no position respecting the validity of any patent rights asserted in connection with any item mentioned in this standard. Users of this standard are expressly advised that determination of the validity of any such patent rights, and the risk of infringement of such rights, are entirely their own responsibility.

This standard is subject to revision at any time by the responsible technical committee and must be reviewed every five years and if not revised, either reapproved or withdrawn. Your comments are invited either for revision of this standard or for additional standards and should be addressed to ASTM International Headquarters. Your comments will receive careful consideration at a meeting of the responsible technical committee, which you may attend. If you feel that your comments have not received a fair hearing you should make your views known to the ASTM Committee on Standards, at the address shown below.

This standard is copyrighted by ASTM International, 100 Barr Harbor Drive, PO Box C700, West Conshohocken, PA 19428-2959, United States. Individual reprints (single or multiple copies) of this standard may be obtained by contacting ASTM at the above address or at 610-832-9585 (phone), 610-832-9555 (fax), or service@astm.org (e-mail); or through the ASTM website (www.astm.org).
