Expert Finishing

Count on consistent, high-quality finishing. Our state-of-the-art manufacturing facility utilizes a multi-step professional finishing process. This meticulous process guarantees that finishes maintain a high degree of color and application accuracy from cabinet to cabinet, which means that every cabinet will look stunning.

Our cabinets and accessories feature water-based ultraviolet (UV) coatings. Water-based UV coatings emit low Volatile Organic Compounds (VOCs) and are environmentally responsible. Ultraviolet finishing uses light instead of heat for curing and the benefits include no environmental pollutants or solvents to evaporate, increased chemical resistance and durability.

Premium Multi-Step Finishing Process

1. The finest wood components are sanded with precision
2. A balanced base coat is applied to ensure a consistent, quality finish
3. First stage ultraviolet (UV) curing process occurs
4. The wood is finely sanded and vacuumed
5. A tinted primer is applied as a foundation for our superior finish
6. Second stage (UV) curing
7. The wood is finely sanded and vacuumed
8. The solid paint layer is evenly applied
9. Third stage (UV) curing
10. The wood is finely sanded and vacuumed
11. First layer of water based clear coat is applied
12. The components go through the dryer to prepare for final processing
13. The wood is finely sanded and vacuumed
14. Second layer of water-based clear coat is applied
15. The components go through the dryer once again
16. Final sanding for a smooth surface and vacuumed for a thorough cleaning
17. A final layer of topcoat is evenly applied
18. Oven cured for catalyzed hardened finish
19. Visual inspection with a color consistency examination performed

Process for stained products varies slightly from the above steps.

Quality Comes First

Cabinets should withstand the demands of daily use and maintain their integrity throughout their lifetime. That's why when we designed NorthPoint Cabinetry we paid attention to all the details from start to finish. Each cabinet is just as functional on the inside as it is beautiful on the outside.

It Starts with Quality Wood

Just as a healthy tree needs strong roots to thrive, so too does a quality cabinet require premium lumber at its core. Our cabinets feature solid wood construction, so the quality of wood is of utmost importance.

Structural Integrity

Meaningful yet hidden reinforcements, like solid wood corner blocks and strategically placed hidden pocket screws, help reinforce the structural integrity of the cabinet. Take comfort that these well-constructed cabinets will stand the test of time.

Thoughtful Craftsmanship

Boasting an innovative dovetail and hidden pocket screw construction, these cleverly designed cabinets achieve robust quality and quick, accurate assembly.

Cabinet Lineup

WALL CABINETS

12" deep except where noted

Compact BLUMOTION 38B Face Mounted Hinge and Mounting Plate: 107 Degree, 1-3/8" or Greater Variable Overlay, Dowel or Screw-On Installation, Soft Closing

★★★★★ Rating 4.7 | 1,560

Reviews | Our Item Number BH-38B358BF22

COMPACT BLUMOTION hinges are a one piece hinge, specifically designed for face frame cabinets. The soft-close feature is built right into the hinge cup, which means doors close silently each and every time. The BLUMOTION feature is adaptable, so even if you slam the door, you won't damage it. The door will still close softly for the life of the hinge.
