

5680 Series premium DP 65 IMPACT Vinyl Single Hung (3/4 OA glass)

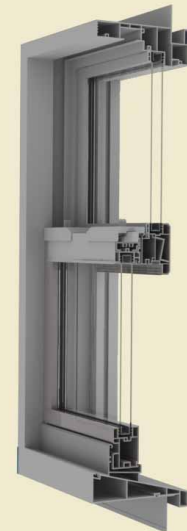

Features and benefits:

- 4 11/16" Vinyl Jamb
- **Designed to withstand large missile impact**
- **Tested for wind zone 4 requirements**
- **Withstands a wind load of 171 MPH without the window breaking**
- Protects against leaking with rain gusts of up to 62 MPH
- 180 Brick mould
- Full length finger plow on
- Continuous head & sill
- 14° Sloped sill for superior water run-off
- "i; 1/2" Insulated glass for energy efficiency
- 3/8" Laminated glass with 0.90 PVB interlayer
- Stainless steel coil balance system
- Aluminum Sill nail fin for added strength and rigidity

Technical Information...

5680 Series
Impact Single Hung

This window is based on the 5610 platform. **This window is suitable for Large-missile impact coastal applications.** Has a very beefy latch assembly and fully reinforced sash with aluminum, to handle large missile impact loads. The window also has 0.090 inch interlayer laminated glass. One of the problems with most impact windows is that they are retrofitted with add-on hardware to pass large missile impact loads. Our window was designed from the get-go to handle these loads. The video to the left describes our unique way that we tie the aluminum together inside the sash styles and rails, which is exclusive to our window design. Our higher end windows have a decidedly "wood look", dimensionally. If your in the market for an high performance Single Hung window that looks like wood from the curb, has a true 180 brickmould, a 14 degree slope sill--like a traditional style wood window--then the 5680 window is the window for you. This window has been tested to a design pressure of 65 (DP65). This means that the window can ***withstand a wind load of 195 MPH without the window breaking.*** A DP65 window also has to pass a water test with wind blowing onto the

window at 62 MPH. Our Series 5665 passes this stringent test, so in other words, ***the window will not leak with rain blowing against the window at 62 MPH.*** Our Series 5665 comes with a factory integral mull on multiple windows, which creates a continuous head and sill--which further eliminates leaks in the field. The video explains why MGM's Impact vinyl window product is better than anything in the industry. **We are the only company that can offer windows twined from the factory.** Everyone else requires the windows to be mulled in the field which costs time and money. ***If you can find an impact vinyl window that looks aesthetically pleasing and performs***

better than our window, then, by all means--buy it!
