*Please provide template / cutsheet of Electric Strike. This will be required before the door and frame can be ordered.

Cylinder - Furnished By Owner

*If the lockset needs to be used to control the door with the card reader, then the 8217 cannot be used. It is not an electrified lock. Also, the 8217 is not recommended for doors used in Life Safety Egress in which this applies.

**Here are some options:

1) If the electric strike (furnished by owner) remains, then the 8217 should be changed to 8227 (storeroom lockset). However, this would still allow unlimited egress.

2) Remove the electric strike and use the 8272 Electrical (Fail Safe) with RX (request to exit) function. This would require an electrified hinge, ElectroLynz Harness, and power supply.
