Reader 644

Overview & Key Features | Specifications

The Model 644 Pass-Through Card Reader combines ease of use with installation flexibility. The Model 644 mounts simply on a wall or on a door mullion, and is available with a black or white case. One simple motion through the card slot reads a card. A bi-color LED winks to confirm that a card has been read, then changes color when the door unlocks.

- Pass-through card reading for quickest use
- Connects to access systems using either Wiegand or Clock-and-Data input
- Reads security badges, time and attendance badges, parking cards, and more (must be format compatible)
- Read head assembly is field-adjustable to track location 1 or 2
- Mounts on single-gang electrical box or directly on a door mullion
- Two year limited warranty covering parts and labor
