general notes

REFLECTED  
CEILING PLANS

**general notes**  
all ceilings without height noted to be assumed 9'-0"  
this reflected ceiling plan is provided to illustrate architectural items and to provide a point of reference for placement of mechanical and electrical items penetrating the ceiling. general contractor shall refer to mechanical electrical drawings and specifications for scope of work. omission of some on this reflected ceiling plan does not relieve the contractor of any obligation from provisions of items shown on mechanical and electrical portions of the documents

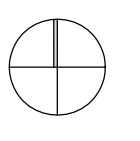

general contractor and his mechanical subcontractor(s) shall recognize as a requirement of this project careful coordination of ductwork, sprinkler piping, lighting fixtures and furring of structure. no fabrication of ductwork shall begin until the general contractor has verified that all ceiling heights shown herein will indeed allow proper clearances for ductwork, lighting and furring. general contractor shall notify architect in writing of any conflicts so that modifications may be made prior to fabrication  
sprinkler heads to be located in the center of acoustical tiles.  
ceiling types shall be as listed on the room finish schedule.
