Re: Construction plans for new residence

Dear David,

Dammon Engineering, Inc. is pleased to respond to your request for our proposal to provide engineering services for the design of your 1,575 square foot camp and boat slip.

Dammon Engineering will provide a site and utility plan, floor plans, piling plan and details, building section and details, exterior elevations, mechanical, electrical, and plumbing plans.

After evaluating our expected design and drafting services, and assuming a construction price of approximately \$157,500.00 (assumed price at \$100/square foot), we propose a fee of 6% of final construction costs, or a total design fee of approximately of \$9,450.00.

If selected, we ask that you provide a \$1,450.00 deposit and we propose to bill \$4,500.00 at 50% design completion, with the balance due following design completion and prior to release of completed plans.

A specification manual can be included with the construction document package at an additional fee if desired. Our fee does not include review/permit fees, cost of survey, soils analysis, drainage studies, wetlands determination, or other engineering studies or government required studies and/or fees.

Dammon Engineering carries \$1,000,000 Professional/General Liability Insurance and Workmen's Compensation Insurance. Unless this offer is previously accepted, it will be withdrawn automatically at 5:00 p.m., 30 days from the date of issue.

We look forward to working with you on this project. Please indicate your acceptance of the above by signing below. If you have any questions, or require any further information, please feel free to call.

Sincerely,

Emmett G. (Pete) Dammon, P.E.
